

Career Guidance

Support Admin - 2021-02-16 - General

The SLIIT Career Guidance and Counseling Unit is established to provide SLIIT undergraduates with an enhanced understanding of career options and industry-required technical and non-technical skills along with available employment opportunities. We seek to empower our students with the knowledge and know-how needed to balance their academic and extracurricular activities, achieve their career aspirations, through a range of course-specific events, workshops and services.

The CGU links with leading corporate and institutions to facilitate the best opportunities for SLIIT students, via annual highlight events such as the SLIIT Careers Day and the HR Forum. These serve as a platform for SLIIT students to meet and contact prospective employers from the Information Technology, Engineering and Business sectors. The CGU also handles vacancy postings, spot-interview sessions, and industry visits which are invaluable to SLIIT students.
